## Summary

Software Engineer with 3+ years of experience building scalable, production-grade web applications across EdTech and FinTech. Strong in frontend and full-stack development with React.js, Vue.js, Nuxt.js, FastAPI, Java, PostgreSQL, and MongoDB, with experience in cloud infrastructure, CI/CD, authentication, and data-driven applications. Additionally, use AI agents, reusable skills, and automated workflows to reduce repetitive engineering work, accelerate development, and increase engineering throughput.

## Education

### IIITDM Kancheepuram

Bachelor of Technology in Computer Science and Engineering

Sep 2020 - May 2024

Tamil Nadu

## Experience

### Software Engineer

Quatrium Tech Private Ltd

May 2023 – Present

Remote

### BetterLesson – K-12 Professional Learning (EdTech — U.S. Schools)

Tech Stack: React.js, Java, PostgreSQL, AWS, DataDog, CircleCI

- Designed and developed the end-to-end **Coach Matching** system using React and Java, implementing complex business rules, scalable APIs, and PostgreSQL workflows based on coach eligibility, engagement history, reviews, and validation criteria.
- Built the **Coach Invoicing** module for invoice generation, expense requests, status tracking, and Delivery Manager approval workflows.
- Established frontend infrastructure and AWS deployment pipelines using CircleCI and DataDog; resolved **20+ high-priority production issues** within two weeks, improving platform stability across critical workflows.

### Digital Flex – HQIM Adoption Platform (EdTech — U.S. Districts)

Tech Stack: Vue.js, Nuxt.js, Pinia, Vite, FastAPI, MongoDB, SurveyJS

- Led UI architecture and frontend development using Vue.js, Nuxt.js, and Pinia, building reusable components and responsive dashboards including Teacher Dashboard, Class Insights, Student Analytics, Feedback Surveys, and District Admin analytics.
- Implemented drill-down reporting, LMS/IDP integrations, SSO/OAuth, and frontend performance optimizations including lazy loading, code splitting, and efficient state management; served as UI Lead for stakeholder and UX alignment.

### FinTech Document Processing & Verification Platform

Tech Stack: React.js, Vue.js, FastAPI, Kafka, PDF.js, OAuth, Google Maps API

- Built modular document-processing interfaces supporting **5+ financial services** and refactored bank statement analysis using FastAPI and Kafka-based asynchronous processing with automated report delivery, reducing manual effort by **40%**.
- Developed digital KYC and address verification using geolocation, Google Maps, selfie capture, e-signature, and multi-document uploads, reducing manual verification by **60%**; also built OAuth-based social content scheduling and campaign tracking for **500+ accounts**.
- Applied AI agents, reusable skills, and automated workflows alongside product development to automate repetitive engineering tasks, including Jira story processing and contextual comments, accelerating development and increasing engineering throughput.

## Technical Skills

**AI & Automation:** AI Agents, Agent Skills, LLM Workflows, Workflow Automation, Jira Automation

**Frontend:** Vue.js, Nuxt.js, React.js, Pinia, Redux, Vuex, Tailwind, Chart.js, PDF.js

**Backend & Data:** FastAPI, Node.js, Flask, Java, REST APIs, MongoDB, PostgreSQL, MySQL, Firebase

**Cloud, DevOps & Tools:** AWS, GCP, Docker, CircleCI, GitHub Actions, Kafka, Nginx, Git, GitHub, GitLab, Postman, Figma

**Languages & Security:** JavaScript, TypeScript, Python, Java, C++, SQL, HTML5, CSS3, OAuth 2.0, SSO, JWT, AES
